

## User Stories

1. As a user I would like to create an account in the application using my email and password. (David)
2. As a user I would like to authenticate with my email and password in the application after creating an account. (Kevin iOS, David and Kevin Android)
3. As a user I would like to be able to change my password if I were to forget it, this way I would not lose the progress of my account. (Kevin apps and Enrique API (sends email))
4. As a user I would like to create a new project in my account and be an administrator of it. (Enrique with Kevin help)
5. As a project manager I want to be able to add participants to it. (Kevin)
6. As a user I want to be able to access all the projects in which I participate. (Luis with Kevin help)
7. As a user I would like to receive emails to verify the creation of my account in the application. (Enrique)
8. As a user I would like my stored data to be secure. Validate user input to avoid compromising resources and / or data. (Enrique)
9. As a user I would like to have a list of contacts that I could then add to my projects. Also to be able to send friend requests and reject or accept them. (Kevin)
10. As a user I would like my credentials to be stored in the system so that I do not have to enter my email and password at all times. (iOS David and Android Kevin the storing and loading of the credentials and Enrique the fingerprint handler)
11. As a user I would like to be able to access the device's camera and take photos that are saved in the gallery. (iOS Luis and Android Kevin)
12. As a user I would like my password not to be stored in an unsecured way. (Kevin)
13. As a user I would like for the creation of my project to reserve a space on the server for my data. (Enrique)
14. As a user I would like to be able to make audio recordings. (iOS David and Android Kevin)
15. As a user I would like to be able to open and record videos. (iOS Luis with Prof. Corradas' help and Android Kevin)
16. As a user I would like to be able to take text notes related to my project and save them in the server. (David)

17. As a user I would like my files to be stored on the server and be able to access them from the mobile. (David and Kevin)

18. As a user I wouldn't like for the application to crash when the mobile device loses the internet connection. (iOS David and Android Kevin)

**Functionalities for the project:**

1. Project merging with all the user stories. (Kevin)

2. Server database setup. (Kevin)

3. APIs for the application. (David, Enrique and Kevin)

4. Application layout and data management around the Activities or Views. (David and Kevin)
